## Woodhead Publishing Online

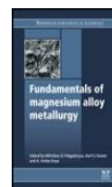

### A clear pathway to precise scientific and technical information

Woodhead Publishing Online is a resource of over 965 e-books containing 17,000 chapters designed primarily for access by the academic library and research community.

We are proud to work with over 10,000 world class editors and authors who contribute to our content, published in niche areas of Materials Science and Engineering; Food Science, Technology and Nutrition; Textile Technology; Energy and Environmental Technology; Biomedicine; Biomaterials; Mathematics and Lipids.

Why not get started by [browsing](#) our collections?

Alternatively, click on the covers below to see a selection of our newly uploaded content.

Our content is regularly updated to include the newest material as it is published. Customers can purchase either by subject collection according to publication year or using our flexible Pick 'N' Mix model. Please see our [pricing and access](#) page for more information.

Our DRM-free e-books are available for perpetual, multi-concurrent user access with no hosting or platform fees. We also provide COUNTER compliant usage statistics and MARC21 records free of charge. To sign up for free access for 30 or 60 days, click [here](#).

We also offer a range of options for individual users wishing to access our content. Chapters can be purchased perpetually or rented for 72 hours, 14 days or 30 days. For more information, please see the individual book page or our [pricing and access](#) page.

To find out more about Woodhead Publishing, please go to our [printed books website](#).

## What's on WPO (Woodhead Publishing One) ?

Available to access on WPO : over 1,000 e-books

- **Materials** – over 470 titles
- **Engineering** – over 300 titles
- **Materials and Engineering combined** – over 550 titles
- **Food science, Technology and Nutrition** – over 300 titles
- **Textile Technology** – over 170 titles
- **Energy and Environmental Technology** – over 50 titles
- **Biomedicine** – c.40 titles
- **Mathematics** – c.60 titles
- **Lipids** – 15 titles

Access at book and chapter level

## Specification of our e-books

- ❖ PDF format
- ❖ Typically around 600 pages
- ❖ Unlimited concurrent users
- ❖ Remote access
- ❖ No DRM
- ❖ Enrolled with Portico
- ❖ Corresponding Free of charge MARC record and static URL

## Welcome to Woodhead Publishing Online!

Woodhead Publishing Online comprises a unique resource currently with over 760 books and containing over 15,200 chapters on materials science and engineering, food science and technology, and textile technology. Each year we add over 80 new books containing over 1,600 chapters to update our subject collections. Each book and each chapter provides an authoritative summary of key research, allowing readers to keep up-to-date with major trends.

Some of the books that have recently been added include:

To see what the site has to offer, why not [Browse](#) the different subjects in our Materials, Engineering, Food and Textiles Collections. Alternatively, use our Search facilities to find the books and chapters you are most interested in.

One of the most innovative aspects of Woodhead Publishing Online is the range of purchase options available to suit the individual needs of our customers. Visit our [Pricing and Access](#) pages to see what option best suits you.

To obtain further information about Woodhead Publishing Limited or to purchase printed books please visit [www.woodheadpublishing.com](http://www.woodheadpublishing.com). If you have any comments on the Site, please [Contact Us](#).

We will be expanding into new areas such as energy and environmental technology; finance, commodities and investment; library and information science; and mathematics. Please [Join our e-mailing list](#) to keep up with the latest developments.

## Materials Collection

### Materials (382 books)

This extensive collection covers a wide range of engineering materials including: composites, metals, ceramics and polymers. It also covers materials for particular applications such as biomaterials; materials for high temperature applications; materials used in the energy sector; electronic and optical materials; automotive and aerospace materials. The collection also includes key research on corrosion and surface engineering as well as mechanical engineering.
