Abstract ▾

**該本有聲書摘要  
介紹**

Hollywood, 1947. Jack Shannon, a former actor whose promising career was interrupted by the war and ended by a facial scar sustained in combat, is no longer a star. He's a fixer who babysits the studio's stars and covers up their bad behavior.

Everything changes for Jack when Savannah Stevens enters his life. A sexpot star in the mold of Jean Harlow and the studio's biggest box-office draw, she's a mystery. She has breakdowns, unexplained absences from the set, and time-devouring delays occasioned by her paralyzing insecurities and her insistence on dozens of takes.

Jack's job is to stay with her 24/7, deliver her to the set on time each day, and make sure she completes her current picture, a picture on which the future of the studio disappears, and Jack is assigned the task of finding her ... without revealing to anyone, including the police, that she is missing.

In the past, leadership in China has been seen as a traditional concept. However, in recent years, there has been a shift towards a more modern, Western-style leadership. This book explores the development of leadership in China, from its historical roots to its current state. It examines the challenges and opportunities for Chinese leaders in the global economy, and provides insights into the unique characteristics of Chinese leadership.

Disruption is happening everywhere and in every aspect of our lives. It is happening at a scale and speed that is unprecedented in modern history impacting diverse industries. Not every disruption is driven by advances in technology as we have seen in the case of COVID-19 pandemic which has caused massive disruption to the economy, businesses and individual lives.

Leadership in Disruptive Times focuses on navigating the organizational challenges following the aftermath of the unprecedented global COVID-19 crisis and the disruption caused by digitization at the workplace in the era of the Fourth Industrial Revolution (better known as Industry 4.0). It provides organizations and leaders with the relevant tools, frameworks and best practice approaches to develop and map their digital transformation journey in today's highly disruptive, increasingly volatile, uncertain, complex, ambiguous (VUCA) and digital-driven workplace.

viii ABSTRACT This book provides insights into an understanding of disruptive leadership. It explores the transformation of organizations in today's highly disruptive, increasingly VUCA, and digital-driven era of the Fourth Industrial Revolution (also known as Industry 4.0). It builds the case for organizations to revisit and, at times, reinvent their people strategy, internal systems and processes, and deploy the technologies that would suit disruptive times. The book also examines

26 LEADERSHIP IN DISRUPTIVE TIMES

Robert Johansen, who developed the VUCA Prime Model (Figure 2.2), is a distinguished fellow at the Institute for the Future and the author of *Leaders Make the Future: Ten New Leadership Skills for an Uncertain World*. Johansen flips the VUCA model and focuses on the characteristics and skills business leaders must develop to counter the effects of a VUCA environment. Johansen proposes that the best VUCA-driven disruptive leaders have a vision, understanding, clarity, and agility (Johansen 2012).

Volatility can be countered with vision. In uncertain times, Leaders with a clear idea of what needs to be can better weather disruptive events, such as economic downturns or new competition. Leaders need to counter the turbulence while keeping a clear vision.

Uncertainty can be countered with understanding and the ability to make sense of the environment. In a VUCA environment, leaders must understand their functional areas to make sense of the changes. Leaders would be required to communicate effectively within the organization and to develop and demonstrate leadership skills leveraging on the SCORE™ high-leverage skills (see Chapter 9 for details; Bawany 2019a).
