## Funding Insights

### Research Agencies Respond Swiftly to Zika Outbreak

Reacting to the recent Zika virus (ZIKV) outbreak, global research funding organizations, including the European Commission, the National Science Foundation (NSF), the National Institutes of Health (NIH), and the São Paulo Research Foundation (FAPESP), are seeking ZIKV-related research proposals.

The World Health Organization (WHO) declared the virus a Public Health Emergency of International Concern following a recent spike in the number of severe congenital brain malformations in Latin America. Prior to 2013, the mosquito-borne virus was best known for relatively mild symptoms. However, large increases in medical conditions like microcephaly and neurological disorders in affected regions raise troubling questions about potential ZIKV complications.

In response, the international community has swiftly set up mechanisms to fund urgently needed

### Funding Insights

#### ORCID Requirement Growing for Grants from Top Sponsors

In step with numerous national governments and funding agencies, the Wellcome Trust and the Austrian Science Fund (starting 2016) require applicants to provide an Open Researcher and Contributor ID (ORCID) number when submitting funding applications. These numbers are persistent digital identifiers ascribed to individuals that provide "a transparent method of linking research activities and outputs".

Other foundation and government funders that have integrated ORCID identifiers into their grant submission systems now include Autism Speaks, the U.S. Department of Energy, the U.S. Food and Drug Administration, the U.S. National Institutes of Health, the Brazilian Fundação para a Ciência e a Tecnologia, the Japan Science and Technology Agency, Qatar National Research Foundation, and the UK National Institute for Health Research.
